
Alexander Grinman Rivera

Computational Engineering Student | TS Clearance

agrinmanriv@gmail.com | (210) 907-5934 | Website: agrinmanriv0537.github.io

EDUCATION

THE UNIVERSITY OF TEXAS AT AUSTIN

B.S. Computational Engineering | Cockrell School of Engineering

Expected May 2028

GPA: 3.54

Business Minor completed Jul 2025 | McCombs School of Business

TECHNICAL EXPERIENCE

SUZANO PACKAGING

Process Control Intern

Jun 2026 - Aug 2026

- Built and deployed an LLM assistant used by management and process control teams, using vLLM, NVIDIA Nemotron models, NemoClaw, and OpenWebUI.
- Converted legacy control-system software into unified function-block diagrams and a searchable semantic model to support troubleshooting, documentation, and root-cause analysis (RCA).
- Integrated historian data through AVEVA PI Web API and AF SDK; built production process-simulation models with Python and scikit-learn.
- Connected historian-based simulation workflows to OpenPLC via Modbus to validate software outputs through read-back checks.
- Built a React presentation for leadership to explain the system and demonstrate its capabilities.

BOOZ ALLEN HAMILTON

Cybersecurity Intern

Jun 2024 - Present

- Built a command-and-control dashboard in Python, integrating cybersecurity tools through REST APIs into a centralized interface.
- Documented technical workflows for team review and continued development in a cleared environment.

ENGINEERING PROJECTS & TEAMS

LONGHORN RACING: BAJA SAE | UT Austin

Software Team Member

Jun 2025 - Present

- Develop foundational Python telemetry software to organize vehicle sensor data and display it meaningfully for testing and analysis.
- Collaborate with electrical and mechanical teams on sensor interfaces, telemetry requirements, and the dashboard and vehicle-firmware architecture.

TECHNICAL SKILLS

Programming: Python, C++, Java

AI & Data: vLLM, NVIDIA Nemotron, OpenWebUI, NemoClaw, scikit-learn

Software & Integration: React, Git, Docker, REST APIs, AVEVA PI Web API, AF SDK, OpenPLC

Engineering: Process control, system identification, time-series analysis, telemetry, robotics

Languages: English, Spanish
